REPLY TO
ATTN OF: M/S 345

Mr. Dave Wolske
Westinghouse Electric
614 N. Tillamook Street
Portland, Oregon 97227

Dear Mr. Wolske:

This letter will confirm our plans to visit your facility on January 28, 1976 as discussed with you today.

The purpose of our visit is to obtain information regarding the use of transformer/capacitor oils containing polychlorinated biphenyls (PCB) by use of questionnaires developed by our headquarters EPA office and where appropriate by obtaining samples of liquid effluent discharges and soils in loading and storage areas.

We look forward to meeting with you on Wednesday. As presently planned, the time required for questionnaire completion, inspection of facilities and possible sample collection may involve most of the morning.

Should you have additional questions regarding our visit, don't hesitate to call me at (206) 442-1193.

Sincerely

Daniel K. Tangarone
Daniel Tangarone
Sanitary Engineer
